

A. Massage Only System

The Massage system has four different settings:

Push the non-latching switch upwards once for lower back low-intensity massage, twice for a more high-intensity massage in the lower back, a third time for your upper back and lower back low-intensity massage, a fourth time for both upper and lower back at high-intensity massage and a fifth time to shut the massage function off.

II. WHAT TO EXPECT

The massage will instantly turn on once the switch is pushed to your preferred setting.

III. IF MESSAGE IS NOT FELT CHECK THE FOLLOWING:

- 1) Check the fuse. The 7.5 AMP fuse is located near the vehicle fuse box in a separate fuse holder. In some installations a fuse tap may have been installed on an accessory fuse in the fuse box in order to provide power for the seat heater. The fuse tap should have been placed on the power side of the accessory fuse. If the fuse tap was not installed on the power side the accessory fuse may have blown.
- 2) Check all the connectors to make sure they are tightly engaged.
- 3) Check the connections to 12 volts and ground. NOTE: The red wire MUST be connected to 12 volts and the black wire to ground.
- 4) For further information contact your installation dealer.
